### PROJECTS

#### Unit Converter

07/2024 - 11/2024

A **unit converter** is a tool or device used to convert measurements from one unit to another. It helps in translating quantities like length, weight, volume, temperature, and more between different systems of measurement. It can convert kilometers to miles, Celsius to Fahrenheit, or liters to gallons..

- Developed UniConvert**, a smart unit conversion tool for seamless measurement transformations across multiple domains.
- Enabled cross-system compatibility** by supporting metric, imperial, and custom units.
- Enhanced user efficiency** by simplifying complex calculations and reducing manual errors.

#### TEXT TO SPEECH

12/2024 - 04/2025

**Improves user experience** in education, assistive technology, and smart devices by making content more accessible and engaging.

- Developed a Text-to-Speech (TTS) system** that converts written text into natural-sounding speech.
- Supports multiple languages and voices**, enhancing accessibility for diverse users.
- Integrated with real-time processing**, enabling instant audio feedback for dynamic applications.
